

December 2018

Dear Sir or Madam,

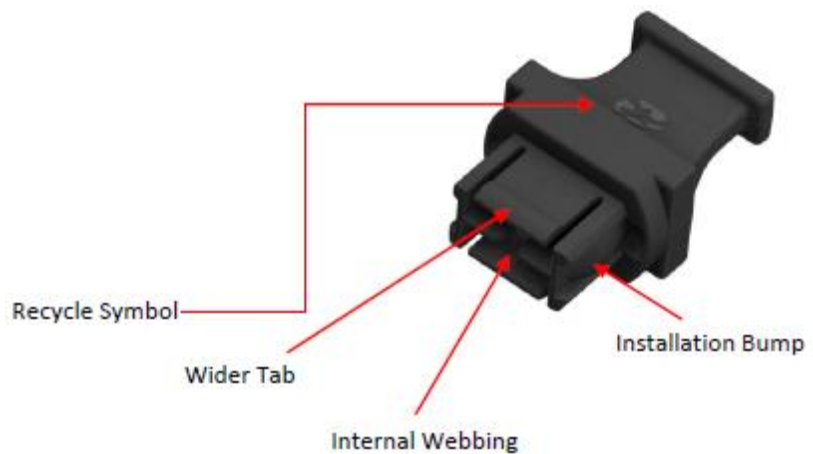

Please accept this document as a formal notification that SYLEX will be gradually replacing existing MTP adapter dust plug with new redesigned version. This change is based on the decision of our connector supplier (US Conec) which constantly improves all products. The new MTP adapter dust plug will be compatible with all MTP adapters.

Below you will find pictures with dust plug in old and new design.

Current design

New design

This change will affect all adapter dust plugs, purchased either individually or as a part of an adapter and it will be considered also as a running change, coming into effect after stock of the current dust plugs are depleted.

Sincerely,

Your SYLEX team
